

KINKADE GENEOLOGY

The following material was taken from two studies of the Kinkade family geneology. One of them was compiled in 1901 by John Harry Kinkade of Marysville, Ohio. The other study was made in 1932 by Benjamin Dixon, who grew up in Kahoka, Missouri but at that time was with the U.S. Navy.

Successive generations are indicated by the alphabetic designation. "A" represents the original Kinkade near Belfast, Ireland. "B" represents his son—who was the first Kinkade in the United States. "C" represents his grandchildren—"D" the great-grandchildren, etc. The number that goes with the letter identifies the particular individual. Example: D-11, David Kinkade is the great-grandson of the original Kinkade in Ireland. An asterisk (*) is used to designate individuals whose families will be listed in detail.
